Re: Freedom of Information Act Request – Interim Response #7
Tracking Number: 15-FOI-00021

Dear Mr. Hasbrouck:

We are further responding to your October 29, 2014 request for information made under the Freedom of Information Act (FOIA), which was received via e-mail by Amtrak’s FOIA Office on the same date.

Your request seeks the records described below:

(1) Any records of policies, procedures, technical specifications, contracts (including agency appointment agreements), or directives to staff, contractors, or agents pertaining to transfers of data about Amtrak passengers or customers to the Department of Homeland Security (DHS), any DHS component including US Customs and Border Protection (USCBP), the Canadian Border Services Agency (CBSA), any other Canadian government agency, or any other foreign government, or the subsequent handling or use of such data, including without limitation Advanced Passenger Information (API) and any personally identifiable data obtained or derived from the ARROW reservation system.

(2) Any records pertaining to the legal basis for such data transfers, including any e-mail messages pertaining to this subject within or between Amtrak, Amtrak agents, Amtrak contractors, and any third party or parties.

(3) Any records of policies, procedures, technical specifications, contracts (including agency appointment agreements), or directives to staff, contractors, or agents (including without limitation travel agencies and agents authorized to sell Amtrak tickets, and other ARROW users) regarding disclosures to be made concerning transfers of data about Amtrak passengers or customers to government agencies including DHS.

(4) Any records of policies, procedures, reports, or directives to staff, contractors, or agents (including without limitation travel agencies and agents authorized to sell Amtrak tickets, and other ARROW users) regarding compliance with the Personal Information Protection and Electronic Documents Act (PIPEDA) of Canada, including handling of requests for records or other requests or complaints made pursuant to PIPEDA and any disclosures to be made to passengers or customers.

(5) Any e-mail messages within or between Amtrak and Amtrak agents, Amtrak contractors, and any third party or parties containing any of the text strings "Personal Information Protection and Electronic Documents Act", "PIPEDA", or "Privacy Commissioner of Canada".
(6) Any electronic file in which any of the above records are included.

(7) All metadata pertaining to any such file, such as file system information indicating the creation date, modification date, etc.

We are continuing to review and process records responsive to your request. We are releasing in part the attached records.

The names and personal identifying information of Amtrak employees and private individuals have been redacted from the enclosed records pursuant to exemption 6 of the FOIA on the basis that disclosure would constitute a clearly unwarranted invasion of the personal privacy of these individuals. In weighing the public interest, it was determined that there was no public interest in disclosing this information.

Please note, the records we are providing are part of a huge text file (800 pages), which we are reviewing in parts. Due to the size of the file, the last page may contain an incomplete e-mail. Please be advised, the next response will pick up from where we left off.

While reviewing records, there were instances where there were records included in the above-referenced text file that consisted of an entirely different subject matter and not in the scope of your request. These records were considered as non-responsive and have been redacted. According to the U.S. Department of Justice FOIA Guide, “courts have held that agencies responding to a FOIA request need not process and disclose non-responsive records or non-responsive portions of otherwise responsive records.”

Pursuant to Amtrak’s FOIA regulations (49 CFR 701.10), if you wish to appeal the decision to withhold the above-mentioned information, you may file an appeal with Eleanor D. Acheson, Executive Vice President, Chief Legal Officer, General Counsel and Corporate Secretary, within thirty days (30) of the date of this letter, specifying the relevant facts and the basis for your appeal. Your appeal may be sent to Ms. Acheson at the above address. The President and CEO of Amtrak have delegated authority to the General Counsel and Corporate Secretary for the rules and compliance to the FOIA. If you decide to appeal, you may delay your appeal until you have received the final response to your request.

There are approximately 700 more records to review in the text file. We are continually working through our backlog of requests. You may anticipate the next response in 8-12 weeks.
If you have any questions regarding the processing of your request, please feel free to contact me at (202) 906-3741 or via e-mail at Hawkins@amtrak.com.

Sincerely,

Sharron Hawkins
Lead FOIA Specialist

Border Crossing.txt

*Automated Ticketing (TK)
*Print automated one ticket per passenger
*Train Manifests (border crossing manifest should reflect all passenger names)
*Group PNR display issues (TBD)

I will be pulling together the High Level Scope and Sizing document. Once this is complete and approved by our management it will be forwarded to [redacted] and [redacted] will be ensuring that the modifications we are doing are in line with the users' long term goals for Group Processing. [redacted] will be seeking funding from FY06. Estimates from the following for modifications to handle the functions above:

*RailRes Group Desk (Group)
*STARS modifications (Group)
*off-line modifications (Group)
*XAAA/AAPI (Group)
*ARROW - Pricing (Group)
*ARROW - Passenger Data and Ticketing (Group)
*ARROW - Border Crossing Manifest (Group)
*ARROW - CBS (Group)

We would like to pull together the high level scope and sizing as quickly as possible, as this might be funded out of FY06 budget. Could you please respond and let me know when you would be able to have your piece of the sizing completed. I will pull all of the components of the sizing into one sizing document.

Please let me know if you have any questions or comments.

Thanks,

[redacted]

Subject: RE: APIS - Group Ticketing and Enforcement - Sizing
Importance: High

This message has been archived.

Hello [redacted]:

The comments I have are probably issues that you will address. But, after reading through the requirements document I noted the following...

Assumptions...

The maximum number of active individual names in a Group PNR will be 254. Groups of more than 254 will require separate PNRs. (Note: the group name is the first name item in the PNR, which would give a total maximum of 255 name items in a Group PNR)

(254 Names) How will ticketing be accomplished with ARROWS limits on the number of tickets than can be issued per PNR? Ticketing by 3FIELD may be a solution to this issue. However, further along in the document it states that “Payment can only be processed against the entire value of the Group PNR.” With this requirement would we...
Border Crossing.txt

be able to ticket 3FIELDS individually against the FOP that's stored in the PNR? (234 Names) How will travel agents (GDS) be able to claim reservations with the current restriction on the maximum number of passenger names in a PNR (9)?

Deposit PNRs will not be used in the future (deposits will be reflected in the Group travel reservation)

The ability for a travel agent to transmit ticket information through to ARROW relies on their ability to create or claim ownership of a reservation. In the current environment, the Deposit PNR may be a vehicle in which we may be able to capture payment information for a reservation. The ticketing information contained in a Deposit PNR could be used in exchange for the automated group tickets that would be issued by Amtrak's Group Department. An example in which a travel agent accepts payment for travel and relies on Amtrak to issue tickets is the PTA transaction. The PTA is submitted through the GDS to ARROW and Amtrak agents issue tickets against the PTA number that is saved in ARROW.

Business Requirements...

Travel tickets will only produce by via STARS by:
*Group Desk agent
*STARS agent

So it doesn't appear as if GDS issued tickets for this program is part of the requirements?

Hello ,

I know you were trying to work on the GDS Group issues - These are the requirements for automated ticketing and collection of deposits. I wanted to get your feel on this.

Good morning,

Attached is the requirements document.

We have been requested by the Amtrak Police to provide a High Level Scope and Sizing that will allow for improved Group security. The main focus of this effort will be to provide:

*Method to enforce the border crossing requirements for Group PNRs
*Individual tickets for passengers traveling on Group PNRs
Accuracy of on board train manifests

Changes we would be sizing:
* Name associated pricing (3 fields) for Group PNRs
* 7DEP amount/fop (new entry to capture Group deposit information)
* Creates a new 7 field
* Passes data to off-line
* GDS are able to input the total amount
* GDS security for 7DEP on non-claimed Group PNR
* GDS functionality TBD
* Final Payment for Group PNRs
* Final payment
  * The final payment for Group PNR will be calculated by taking the PNR total and subtracting the 7DEP amount
  * Enforcement of Border Crossing Requirements (DOB and PID information for all passengers on cross border segments)
  * Automated Ticketing (SK)
  * Print automated one ticket per passenger
  * Train Manifest (Border crossing manifest should reflect all passenger names)
  * Group PNR display issues (TBD)

I will be pulling together the High Level Scope and Sizing document. Once this is complete and approved by our management it will be forwarded to [redacted] and [redacted] will be ensuring that the modifications we are doing are in line with the Users Long term goals for Group Processing. [redacted] will be seeking funding from FY06. Estimates from the following for modifications to handle the functions above:
* RailRes Group Desk (Group)
* STARS modifications (Group)
* GDS modification (Group)
* AAPI/AAPI (Group)
* Arrow - Pricing
* Arrow - Passenger Data and Ticketing
* Arrow - Border Crossing Manifest (Group)
* Arrow - GDS (Group)

We would like to pull together the high level scope and sizing as quickly as possible, as this might be funded out of FY06 budget. Could you please respond and let me know when you would be able to have your piece of the sizing completed. I will pull all of the components of the sizing into one sizing document.

Please let me know if you have any questions or comments.

Thanks,

Subject: APIS enforcement to be activated for Worldspan

Hello,

The switch to enforce APIS requirements (OSI DOCS) in border-crossing PNRS will be activated for Worldspan at 08:00 EST. (A fix for some warning messages was loaded this morning)

This means that it will be now mandatory to have a valid OSI DOCS item per passenger in all border crossing PNRS before any ticket can be issued. This functionality has been available since Jan 31st but until now it was optional and an OSI DOB could still be used instead. OSI DOBs will be no longer accepted for border-crossing PNRS.

Please let me know if you have any questions or concerns.

Hello

I am currently working with our Marketing area to produce a list of points/discussion items. They would like to supply those to you before setting up a meeting. They want to be sure to have enough time for the meeting. I hope to have something to you this week.

On a separate point, at what time did you want to activate APIS tomorrow - I believe that you stated 8am EST, but we wanted to confirm.

Thanks,

Subject: RE: 1 tkt / pax – Booking Amtrak in a ticket-less environment

Worldspan is interested in the Amtrak ticket-less solution.

I would like to set up a kick-off conference call for either 27th or 28th March to discuss the details. The aim of the meeting is to discuss as many details as possible, including some technical details, thus Worldspan will be also represented by our technical specialist and our corporate booking product specialist.

Could you please advise if you are available on either of those dates?
Hello,

Amtrak is looking to the future for its ticketing relationship with the GDS partners. The plan is to move to an environment where the tickets produced for Travel on Amtrak would be standardized and produced at an Amtrak Kiosk or Station Counter. To achieve this goal, Amtrak would like to start to work on getting our GDS partners into a ticket-less environment.

Amtrak today has a process that we call Advance payment, that in all intent is a ticket-less way to book and pay for travel on Amtrak. As the process is built today it applies to the whole PNR and is not well structured for use by the GDS partners. Amtrak is currently undertaking an enhancement to this process to make it a segment level process, rather than the whole PNR. Amtrak believes that this change will give us the structure to offer a ticket-less solution to the GDS partners.

Amtrak envisions that the GDS would still deal with the validation of payment, and then request ticketing. Amtrak's process would apply the enhanced advanced purchase process, and then return a response to the GDS, so that Travel Agency Back office and ARC/BSP requirements could be met by the GDS system. Payment would flow through the same path as it does today. The customer would get a receipt that they could bring to Amtrak and get their physical tickets.

Amtrak is looking at getting the enhanced advanced purchase into place within the next 9 - 12 months, and would like to have a GDS partner ready to go with the ticket-less option in the same timeframe. Amtrak would like input to understand the interface that the GDS would like to employ and the
Exemption 6

Border Crossing.txt

data that they believe should be included in the process. Amtrak is ready
to sit down and start to plan this enhancement.

Please let us know if Worldspan would be interested in partnering with
Amtrak in this venture.

Many Thanks,

Hi

This is an existing problem in Production and we are working in a fix for this.
Meanwhile the work-around is to enter a letter or number (anything will do: "x", "0" etc) as document number.

So in the example below, the SSR item should look to something like this (until the fix is loaded):

SSR DOCS 2V HK1 BC/JS/X/US/25JUL50/M// /H

To: RE: APIS formats for Worldspan and Amadeus
Subject: This message has been archived.

Hi,

This is basically taken from the Functional requirements documents sent to Worldspan and Amadeus plus some other info I'm adding here. Let me know if you need more information.

Worldspan:

OSI Format:

Agent Entry:
30SL2V DOC52VHK1/RA/US/123456789012345/US/12JUL1964/M/12JUL2004-1TEST

Transmitted information to Arrow:
OSI 2V DOC5 HK1/RA/US/123456789012345/US/12JUL1964/M/12JUL2004-1TEST

(a) (b) (c)(d) (e)(f)(g)(h)(i)(j)(k)(l)

Where:
(a)= Supplementary Service Code
(b)= Carrier participating in the itinerary and program
(c)= "Primary Travel Document" SSR Code
(d)= Status code and Number in Party
(e)= Travel document type (2 Character)
(f)= Travel document issuing Country (2 Characters)
(g)= Travel Document Number (25 Characters max)
(h)= Passenger Nationality (2 Characters)
(i)= Date of Birth (DDMMMMCCYY or DDMMMYY)
(j)= Gender of passenger
*M = Male
#F = Female
*M = Infant Male
#F = Infant Female
(k)= Travel Document expiry date (DDMMMMCCYY or DDMMMYY). When omitted an oblique should immediately follow.
(l)= Passenger associated name including number in party

All fields following (d) must be separated by an oblique (/). If the field is not provided an oblique (/) is inserted to indicate an element is missing.

If the size of the OSI item is too long for the system to handle it, it can be split in several lines, including three obliques after the mandatory OSI 2V after the second line, followed by the remaining text. In any way the order of the fields (((a) ... (l)) must be maintained.

Example:
OSI 2VD0C8KH1/RA/US/123456789012345/US/12JUL1964/M
OSI 2V///12JUL2004-1TEST

Note that in the second OSI there are four obliques: the first three to indicate continuation from previous line, and the fourth as part of the field separator between M and 12JUL1964.

Example for Birth Certificate
OSI 2VD0C8KH1/BC/US/123456789012345/US/12JUL1964/M///
OSI 2V///-1TEST

No expiration date included. See // after M indicating empty field.

Amadeus:
SSR Format:

SRDOC52VKH1-PR-US-123456789012345-US-12JUL64-M-12JUL04-TEST-H/P1

Transmitted information to Arrow:
SSR DOCS 2V HK1/RA/US/123456789012345/US/12JUL64/M/12JUL04/TEST-H-1TEST///
(a) (b) (c)(d) (e)(f)(g)(h)(i)(j)(k)(l)(m)(n)(o)

Where:
(a)= Supplementary Service Code
(b)= "Primary Travel Document" SSR Code
(c)= Carrier participating in the itinerary and program
(d)= Status code and Number in Party
(e)= Travel document type (2 Character)
(f)= Travel document issuing Country (2 Characters)
(g)= Travel Document Number (15 Characters)
(h)= Passenger Nationality (2 Characters)
(i)= Date of Birth (DDMMCCYY or DDMMYY)
(j)= Gender of passenger
*M = Male
#F = Female
#MI = Infant Male
#FI = Infant Female
(k)= Travel Document expiry date (DDMMCCYY or DDMMYY)
(l)= Travel Document Surname
(m)= Travel Document First Given name
(n)= Multi-passenger PNR - Primary passport holder indicator (option)
(o)= Passenger associated name including number in party

All fields following (d) must be separated by an oblique (/). If the field is not provided an oblique (/) is inserted to indicate an element is missing.

If the size of the SSR item is too long for the system to handle it, it can be split in several lines, including three obliques after the mandatory SSR DOCS 2V after the second line, followed by the remaining text. In any way the order of the fields ((a) ... (o)) must be maintained.

Example:
SSR DOCS 2V HK1/RA/US/123456789012345/US/12JUL64/M/12JUL04
SSR DOCS 2V ////TEST/JOE/H-1TEST/JOE

Note that in the second SSR there are four obliques: the first three to indicate
continuation from previous line, and the fourth as part of the field separator between 12JUL04 and TEST.

Error responses for Worldspan/Amadeus:

A valid passenger information item will be added to the Arrow PNR, and no response will be returned. In the case of an error, Arrow will return an advisory message to that effect and that no action has been taken to update the Arrow system. The message will be returned in SSR 0THS elements.

Errors:
ADVISE PSGR: VALID PHOTO ID REQUIRED
INVALID FORMAT
INVALID ID TYPE FOR NON-US/CA CITIZEN
INVALID GENDER, MUST BE M OR F
PSGR NBR TOO HIGH FOR NBR OF NAMES ENTERED
INVALID PSGR NUMBER (MUST BE 1-19)
DOB NOT ACCEPTED. USE DOCS FORMAT INSTEAD
PAX ID INFORMATION REQUIRED PRIOR TO TICKETING

Ticketing:
PAX ID INFORMATION REQUIRED BEFORE TICKETING

Hi

I have been put in charge of drafting a one page document to notify Amadeus and Worldspan agents on the new APIS formats and I was advise to contact you. I believe the formats and error responses would be the way to go. If possible would you please email me the formats and all possible error responses. Error responses like if an agent put insufficient data in the PNR or not in the proper format or if they try to end the record with no PID info. Thanks and please call me if you need additional info.

Amtrak Travel Agent Sales Center

Hi

All ok, as we agreed we are going live with APIS on March 21st.

I have notified all relevant WSP departments.
Hi,

The last tests conducted by [REDACTED] were successful. We are going live with the changes and the Amtrak script on March 21st.

[REDACTED], I have updated the HD notification with the PNR examples.

(See attached file: AMTRAK_Psgr_ID - HD Documentation March 14th-06.doc)

Thank you.

Hello **

I have tested a few PNRs with ** this morning and everything looks good, both in 1P and on the Amtrak side. We are receiving the new comments from Amtrak when needed (Example 1, GFAAX Number 5). It looks like we are ready to go live with this project.

Example 1: Here is an example of when the new bit is turned on, I created the PNR and
ended transaction without the DOB or APIS information, I received the correct SSR of PAX ID INFORMATION REQUIRED PRIOR TO TICKETING. I then added the 'old' DOB format and ended the PNR, I received the correct SSRs:
5. SSRTHS1PPK1 DOB NOT ACCEPTED. USE DOCS FORMAT INSTEAD
6. SSRTHS1PPK1 PAX ID INFORMATION REQUIRED PRIOR TO TICKETING

Next, I added the correct APIS format and ended the PNR. The OSI was accepted and everything looks good.

Re: APIS and Amtrak (Document Link: [redacted])

Hi [redacted],

Thank you very much for that. You will find my comments in bold red in the attachment.

I do not have an example of Amtrak advisory responses. I will retest it today and provide examples.

(See attached file: AMTRAK APIS GRS HELP INFO PAGES.doc)

I do not have any comments regarding the GO! home page. I asked [redacted], account manager for rail, to provide her comments.

Re: APIS and Amtrak (Document link: )

Hi 

Thank you very much for that. You will find my comments in bold red in the attachment.

I do not have an example of Amtrak advisory responses. will retest it today and provide examples.

(See attached file: AMTRAK APIS GRS HELP INFO PAGES.doc)

I do not have any comments regarding the GO! home page. I asked , account manager for rail, to provide her comments.

Subject: RE: Amtrak APIS release to be rescheduled

This message has been archived.

Hi 

March 21st is the new target date. Unless something goes wrong during testing and cannot be resolved on time, it should be released that date.

The "confusing" warning is not going to be suppressed as it is a generic warning for all users of Arrow. What I'm doing instead is to change the wording of the two warnings for Worldspan if APIS is activated so it does not generate confusion.
Border Crossing.txt

They will be as follows:

1- If an agent includes an OSI DOB in a border-crossing PNR with APIS being active, after end transaction the OSI DOB will be ignored, not processed and the following message will be sent back to Worldpsan:
SSROTHSIAK1IDOB NOT ACCEPTED. USE DOCS FORMAT INSTEAD

2- If a border-crossing PNR goes to end transaction without the OSI DOCS having been inserted, after end transaction the following message will be sent back to Worldpsan:
SSROTHSIAK1 PAX ID INFORMATION REQUIRED PRIOR TO TICKETING

This second message makes more sense when APIS have been activated and doesn’t get in conflict with the first one if both are generated together.

Please let me know if you have any further questions or concerns.

Thanks

Subject: RE: Amtrak APIS release to be rescheduled

Hi ,

Are you 100% sure that APIS will be released on 21st March? It is VERY important to us to know the exact date as I need to know at least a week in advance to notify relevant departments. We have also thought about updating our internal documentation with the responses we were talking about at our last conf call.

As far as I remember, one of the SSR warning messages will be suppressed, another one will be changed? Is this correct? Will we get any new error messages?

, we will need an example PNR with the SSRs. Could you please highlight which SSR message is new or has changed.

If we are going live with APIS on March 21st, then I need the examples today or Monday the very latest, as the help desk notification must be sent a week prior the release.

I also need a clarification whether the APIS info is required for any trip either FROM the US to Canada or only FROM Canada to the US or both directions?

How about one way from the US?

Thank you.

RE: Amtrak API5 release to be rescheduled

Hello [Redacted]

I'll let [Redacted] answer the first question, but for the last question, if the PNR contains a segment that crosses the US border in either direction, it requires PID and DOB - it's the same rule that applies today for DOB, we're just adding PID to that.

Subject: RE: Amadeus PID format

The format is correct. I also got the NO AIR SEGMENTS response. I talked to [Redacted] in Amadeus and she says that it is probably because they didn’t load the required code for this functionality in their test system today. It will have to wait until Monday morning.

Subject: Amadeus PID Format

Hello All,
We haven't had any luck getting an Amadeus PIDs in test. The format provided was:
SSR DOCS 2V HK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/TEST/JOE

So far, we haven't had any work. For example in test PNR OFF202:

If I enter
SSR DOCS 2V HK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/
Response: CHECK FORMAT

If I enter:
SRDOS2VHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/
Response: CHECK FORMAT

If I enter:
OS2VDOCS2VHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/
Response: *but it doesn't come across to Amtrak PNR

If I enter:
OSJ2VDOCSHJK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/
Response: Something about Invalid Airline code, OSI will be deleted at ET

If I enter:
NS?VNOglesHJK1/pp/US/123456789012345/US/17JUL64/M/17JUL04/
Response: does not add to Amtrak pnr

Are we doing something wrong?

Subject: Re: Amtrak APIs release date

Worldspan's customer notification needs to be put out today - as early as possible - if this is being implemented tomorrow. Since the information will be mandatory, we need to ensure Gday, Go! Dateline and the home page are updated to avoid impact to customers and the Help Desk. I am also waiting for confirmation to advise Sales of the proper implementation date. Please advise ASAP.

Kindest regards,

Amtrak APIS release date

Could you please update us on the release date asap, as we have everything in place to release the changes, we are ready to go live with the latest version of Amtrak script, we also have already sent the customer notifications regarding the APIS release date for the 7th March. I am off sick since last Thursday and I do experience some difficulties to access my emails. I am available under this phone number [redacted]. Could you please send me an email and also give me a call.

I have not received the Amtrak customer notification yet, could you please send this asap.

Subject: APIS - Group Enforcement (Group Ticketing) - High Level Sizing

This message has been archived.

Good Afternoon,

We have been requested by the Amtrak Police to provide a High Level Scope and Sizing that will allow for improved Group security. The main focus of this effort will be to provide:
*Method to enforce the border crossing requirements for Group PNRs
*Individual tickets for passengers traveling on Group PNRs
*Accuracy of on board train manifests

Changes we would be sizing:
*Name associated pricing (3 fields) for Group PNRs
*7DEPartment/fop(new entry to capture Group deposit Information)
*Creates a new field
*passes data to off-line
*GDS are able to input the total amount
*GDS security for 7DEP on non-claimed Group PNR
*GDS will not perform the 7APP or TK function
*Advance Payement Entry (7APP) for Group PNRs
*Final payment
*The final payment for Group PNR 7APP will be calculated by taking the PNR total and subtracting the 7DEP amount
*Enforcement of Border Crossing Requirements(SDOB and SZID information for all passengers on cross border segments)
*Automated Ticketing (TK)
*Print automated one ticket per passenger
*Train Manifests
*Group PNR display issues(TBD)

I will be pulling together the High Level Scope and Sizing document. Once this is complete and approved by our management it will be forwarded to and will be ensuring that the modifications we are doing are in line with the users long term goals for Group Processing. will be seeking funding from FY06. Estimates from the following for modifications to handle the functions above:
*RailRes Group Desk/Group
*STARS modifications/Group
*off-line modifications/Group who should be involved for this portion of the sizing)
*XAAPI/AAPI/Group
*Arrow - Pricing
*Arrow - Passenger Data and Ticketing
*Arrow - GDS

If there is someone else that should also be included, please let me know.

I will schedule a meeting next week to kick off this process. If possible we would like to have the sizing ready for review by on approximately mid-March.

Thanks,

Subject: RE: Amadeus PID format

This message has been archived.

The format of the entry in Amadeus screen is as follows:
SRDGC52YHK1-PR-US-123456789012345-US-12JUL64-M-12JUL04-AMTRAKTEST-JOE-H/P1

It will internally convert to the proper format to be sent to Amtrak.
To: [Redacted]
Subject: Amadeus PID format

Hello All,
We haven’t had any luck getting an Amadeus PIDs in test. The format provided was:
SSR DOCS 2V HK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/TEST/JOE

So far, we haven’t had any work. For example in test PNR OFF702:

If I enter
SSR DOCS 2V HK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/noone/peter
Response: CHECK FORMAT

If I enter:
SSRDOMIC2VHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/noone/peter
Response: CHECK FORMAT

If I enter:
OS2VDOCSS2VHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/noone/peter
Response: *(but it doesn’t come across to Amtrak PNR)

If I enter:
OS12VDOCSSHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/noone/peter
Response: Something about Invalid Airline code, OSI will be deleted at ET

If I enter:
OS2VDCSSHK1/pp/US/123456789012345/US/12JUL64/M/12JUL04/noone/peter
Response: does not add to Amtrak pnr

Are we doing something wrong?

Subject: Domestic DOM Sizing - Target Date

Good afternoon,

Attached is the Domestic DOM Requirements Document previously sent out by [Redacted]. I would like to have the sizing finished by the end of February, therefore, I would like to have the sizing component pieces returned to me by Friday February 24th.

This sizing includes work from the following areas:
*Quik-Trak
*GDS
*Internet
*VRU

Could you please let me know who will be responsible for providing the sizing and assumptions for these areas?

Also, if you could please let me know if it realistic to have these back by Friday February 24th.

Thanks,

and to all concerned,

If the approach is to re-use existing XAAPI/A-API support developed for Border crossing (DOB plus Country of Citizenship) then my level of effort will be just for testing. However, if a new Arrow field or a new Arrow process or handling will be introduced the level of effort will be more or less 240hrs for WebServices/XAAPI/A-API.

Thanks,

Subject: Domestic DOB Passenger Requirement

We have been asked by Amtrak Police to size the attached Requirements.

It is not clear when or if this will ever happen, and if it does the business process issues will likely be more

of a problem that the purely technical one, but as a starting point, we do need to size it from a purely technical viewpoint for all distribution channels.

VRU
Internet
gds
QuikTrak
RailRes / STARS
AAPI / XAAPI

I would like to get a high level estimate from each of the above areas.
Border Crossing.txt

Please let me know if you have questions or would like to meet to further clarify the requirements.

Subject: RE: SSR DOCS for 2V

Hi,

The name restriction is not being fully enforced in the "travel document name" field (immediately after the expiration date) of the SSR DOCS since this is already done in the passenger name field of the PNR, and since this is a single passenger PNR, we can safely assume that it is intended for the only passenger there.

However, it is mandatory that if there is any name association appended to an SSR DOCS item (as Amadeus does it for multiple passenger PNRS: "-ISURNAME/FIRSTNAME"), the appended name must match completely (surname/fullname) the one in the name field, regardless of what comes in the "travel document field".

Using the same example as below, a name-associated SSR DOCS should look like this in the TTY message:

SSR DOCS 2V HK1/MO/US/123456789012345/US/12JUL64/M/12JUL04/TEST/3-TEST/JOE

Note the name associated at the end of the SSR DOCS item: "-TEST/JOE". If "-TEST/J" were received instead there it would be invalid as there is not exact match with any name in the PNR. (Note that TEST/J is still accepted as "travel document name" even there: "TEST/J-TEST/JOE").

Since this association is automatically appended by Amadeus for multiple passenger PNRS, we shouldn't encounter any problems with this.

Let me know if you have any further questions.

By the way, in the example mentioned in the original email, "MO" was used as document type. Amadeus should have received an OSI OTHS with something like "ADVISE PASGR:VALID PHOTO ID IS REQUIRED" which was not appended to the Amadeus PNR. Do you know if the "":" in the text is causing the OSI to be rejected by Amadeus?

Subject: RE: SSR DOCS Implementation for Amtrak

Besides of retrofitting the updates, I will update the error message list. I didn't include all of them but only the ones I think they may receive. (I just passed whatever comes from PD package + the BC photo id warning)

They would be:

ADVISE PSGR: VALID PHOTO ID REQUIRED
INVALID FORMAT
INVALID TYPE OF ID
INVALID STATE CODE
INVALID COUNTRY CODE
INVALID ID TYPE FOR NON-US/CA CITIZEN
DOB AND PID COUNTRY CODE SHOULD MATCH
INVALID GENDER, MUST BE M OR F
INVALID EXPIRATION DATE
ID NUM OR GENDER, NO EXP DATE FOR BC
FOR MO/MC/BC COUNTRY CODE IS US OR CA
IF BC ENTERED, COUNTRY CODE SHOULD BE US OR CA
PSGR NBR TOO HIGH FOR NBR OF NAMES ENTERED
INFANT NOT FOUND FOR THIS PASSENGER
INVALID PSGR NUMBER (MUST BE 1-19)

Subject: RE: SSR DOCS Implementation for Amtrak

PNR REQUIRED DOB INFORMATION warning is sent back if you create a cross-boarding PNR and don't include the DOCS, or if the DOCS is invalid (it will go along with the error message). If you create a brand new border-crossing PNR with a valid DOCS in it you won't receive any message.

Subject SSR DOCS Implementation for Amtrak

Hello [Name],

Please follow-up on the updates to HE, GGRA12V, and Amtrak Direct Ref. pages, and advise when the updates are completed.

Also, I am providing you an example of the response I mentioned to you this morning. It doesn't kick in all the time, so there must be something in Amtrak's processing that causes it to be selective. For this scenario, I entered an invalid country code, and received the SSR for this, but the additional SSR requesting the DOB was sent. You will notice that although the SSR DOCS had an invalid country code, the DOB was put in correctly into this element.

To: [redacted]
CC: [redacted]
Subject: RE: SSR DOCS Implementation for Amtrak

PNR REQUIRED DOB INFORMATION warning is sent back if you create a cross-boarding PNR and don't include the DOCS, or if the DOCS is invalid (it will go along with the error message).

If you create a brand new border-crossing PNR with a valid DOCS in it you won't receive any message.

Subject SSR DOCS Implementation for Amtrak

Hello [Redacted],

Please follow-up on the updates to HE, GGRA12V, and Amtrak Direct Ref. pages, and advise when the updates are completed.

Also, I am providing you an example of the response I mentioned to you this morning. It doesn't kick in all the time, so there must be something in Amtrak's processing that causes it to be selective. For this scenario, I entered an invalid country code, and received the SSR for this, but the additional SSR requesting the DOB was sent. You will notice that although the SSR DOCS had an invalid country code, the DOB was put in correctly into this element.

Hello 

Are you busy at the moment? If not, we seem to be having a few issues with the one character first name - we seem to be getting PNRs that don't seem to belong (no single character first name anywhere in the PNR) when there is an error whilst pricing them. I have attached a script that seems to reproduce the issue.

The second issue is that we seem to be getting OSI information, which seems to be all hex '80'. I haven't recreated this problem yet.

Could you investigate?

Thanks,

Hello,

I've noticed in the Q/82 that the OSI message comes across scrambled and there is no phone number (which may not have anything to do with it.) I've also noticed it seems to be Apollo more than Worldspan.

Is there something wrong?

Manager, TASC

From: 
Sent: Monday, January 30, 2006 3:00 PM
Cc: 
Subject: Version 1.2 of APIS document

This message has been archived.

Hi 

It seems that there has been some confusion about the order of the dates in the OSI items, and this was reinforced by the omission of those changes in my latest document.
Border Crossing.txt

For the OSI format (as it is for the SSR format) the first date should be Date of
Birth and the second date should be Document Expiration Date (not accepted for Birth
Certificates).

I am sending a corrected version of the document. I am also including an example on
how to handle Birth Certificates and the Expiration Date which should be omitted on
those cases.

I apologize for this oversight.

Hi,

Here it is. If you can't open it try "view" instead of "launch".

As I mentioned I have been asked to do a gap analysis of this document between the existing TPF interface between Amadeus and Amtrak and the new web services (XML) interface designed by Amtrak to distribute its products online via third party systems.

Could you please advise if this is the latest version of the document and also provide contact information for any questions that might arise.

Hi All,

As per your emails. The year field of the script will now except 2 and 4 digits. I have modified the script so it will format the OSI fields in the format shown below. This follows the order the data should be entered as per the new document. The script has been programmed to always generate three lines of data as shown in the example below, regardless of total field length. I have done it this way mainly...
due to the max number of characters possible for a pax name

Example of entry
30SI 2V DOCX HK1/RA/US/1234567890123456789012345/US/01JAN08
30SI 2V////HK/01JAN71#
30SI 2V///-XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX/XXXXXXXXXXXXXXXX

Host Response
>PG
G: 1.0SI 2V DOCX HK1/RA/US/1234567890123456789012345/US/01JAN08
2.0SI 2V////HK/01JAN71#
3.0SI 2V///-XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX/XXXXXXXXXXXXXXXX

---------- Can you please confirm that you are happy with this format? When you have confirmed to me that you are happy with this format I will forward the modified files to you.

Regards

Hi,

We have just recently received the final version of the Amtrak APIS document, which includes the new OSI format for the passenger ID and gender information for Amtrak.

Could you please double check and advise if the script supports the OSI format according to the latest version of the document. Also, if the script supports both 2 and 4 digits in the "year" field.

Thank you.

Hi all,

This is a newer version of the document. I included the OSI items split feature and removed some conflicts in the order of the fields so it is consistent with the AIRIMP format.

Let me know if you have any questions.

Subject: RE: Business Requirement Document

Some comments:
* She didn't copy in the GDS User representative
* SOLA+B which currently shows DOB information only works for Cross Border Trains. There are no manifest requirements in her document
* Quik-Trak, Metrolink and GDS may have the biggest business issues
* As with our current collection of DOB information, the channels such as Internet, GDS, Call Center, etc. that don't actually show their ID to an Amtrak agent may have accuracy issues.
* There are no requirements included for a phased cutover by channel.

Technical:
* From an Arrow technical perspective this will be very easy.

Basically this is a bigger issue from the business aspect then the technical aspect. I can image that this would be met with some resistance from customers, as the airlines do not currently collect DOB information for domestic travel.

Hi,  

I finished some changes trying to improve the error messages that Amadeus would receive for bad SSRDOCS. So if you still have time today, please go ahead a run your script to see if they look ok in your side. Let me know the RLOC's when you are done.  

If testing is no possible for you today (Wed) anymore, we will have to wait until Monday again.  

Thanks  

PS/ I tried to reached you via phone but left voicemail with the same information.

Hi,

I have loaded the code for SSR DOCS in our test system today so you can test at any
time now. Please let us know the record locators of any PNRs you test so we can
check here as well.

Thanks

Hi,

Happy New Year.

Could you please let us know when the phase 2 of the APIS project will be released? We have made an enhancement to our Amtrak script, thus we need 3 week notice prior the release, in order to be able to go live with the script enhancement.

Thank you.

No yet but I still can put it there. What I'm really concerned about is the order of the fields that Worldspan mentioned. Their main concern was the split of the OSIs which was already addressed but I have the impression that their fields will be in an arbitrary order.
To: [Redacted]

That's the software load right – enforcement will be early February right? And does this code have the CEM check?

Well, I'm sorry that I've let this go on so long. Yes, APIS is in production. Due to resources, we're not going to be able to help you map your code to the industry standard code. When you're ready to work with that industry standard, you can contact [Redacted] and she can assist you with the implementation.

Hello

Yes we have the same list - but Customs gave us a different list - I believe what we need to do our side is map your codes to ours - I listed that below - what do you believe AD, A, C, I, IP, P, F mean and then we'll see about mapping them:

AIRIMP Code
Amtrak Code
Description

RA
US Resident Alien Card

PR
LPR (Legal Permanent Resident) Card
P
PP
Passport
IP
RE
Re-entry Permit

RT
Refugee Travel Document
Border Crossing.txt

NC
Naturalization Certificate

BC
Birth Certificate (requires photo id)

MO
Military Orders (requires photo id)

-----Original Message-----

Sent: Wednesday, August 17, 2005 5:11 PM
To: [Redacted]
Subject: APIS

We will only recognize the following Document Types:
AD, A, C, I, IP, P, F
This is in AIRIMP 29th edition, page 143, 3.14.1.1.
I'll call you when I get in tomorrow.

Subject: RE: APIS Collection and 2 character name warnings

After testing yesterday with [Redacted], we detected a problem with SSRDOCS for infants
that I am investigating now. It seems that all others scenarios in the script went
